PROFILE SUMMARY

From literature to logic, my journey as a Python Full Stack Developer is driven by curiosity and creativity. I transitioned from studying English to building dynamic web platforms using Django, REST APIs, and responsive front-end tools. With a strong foundation in both back-end and front-end development, plus real-world experience in C# applications, I bring a unique mix of communication, design, and problem-solving skills to every project. I'm passionate about using technology to solve real problems, and I'm currently diving deep into AI-enhanced applications and automation. Now, I'm looking for a role where I can grow while delivering real value through code.

SKILLS

Programming Languages	Python, C#, HTML, CSS, JavaScript
Frameworks	Django, REST APIs, Dot Net
Databases	SQLite, SQL Server
Tools & Technologies	Git, Docker, Postman, Crystal Reports, Ubuntu, VS Code, Google Colab
Soft Skills	Problem Solving, Debugging, Time Management

EXPERIENCE

PYTHON FULL STACK DEVELOPER   **Jan 2025 — Current**
Soft Zone Training Pvt Ltd   *Thampanoor, Trivandrum*
- Developing AI-powered web applications using Django to assist students in building real-world academic projects.
- Leading and mentoring 3 student teams through project planning, coding, debugging, and deployment phases.

C# DEVELOPER   **May 2024 — Oct 2024**
Logic Technologies Pvt Ltd   *Tuticorin, Tamilnadu*
- Built scalable retail and supermarket management systems using C#, .NET, SQL Server, and Crystal Reports.
- Created customized reports using Crystal Reports integrated with SQL for real-time data insights.
- Designed and implemented user-friendly interfaces for efficient billing and inventory management.

PROJECTS

Estate Connect – Property Management Platform   **Jan 2025 — Apr 2025**
- Developed a full-stack web platform using Django to connect dealers, customers, and engineers with admin-level oversight.
- Implemented role-based dashboards and Estate Suggestion using AI model with google t5.
- Designed AI-enhanced floor plan feature for auto-generated layouts using Matplotlib.

Organ Connect – Organ Donation Coordination System   **Jan 2025 — Apr 2025**
- Built a Django application for donor/recipient registration staff/hospital management and organ matching.
- Designed donor console forms and recipient request systems.
- Planning AI chatbot integration to assist users with queries using Rasa Server.

ForensicAi - Digital Case Analysis System   **Jan 2025 — Apr 2025**
- Created a web system for managing digital forensic case data using Django.
- Implemented case creation, role-based evidence handling, and AI analysis setup.
- Roles include Admin, Investigator, Evidence Analyst, and System User with defined responsibilities.

Vacation Jobs – Micro Jobs Earnings Portal   **Nov 2024 — Jan 2025**
- Built a scalable referral-based user system, visual user-tree map, email verification to prevent bot logins.
- Integrated Razorpay for seamless payments, ensuring secure transactions with spliting team share into 8 levels.
